

C-TPAT

Our Solutions...Your Success

GTKonnect C-TPAT

GTKonnect C-TPAT, built on the foundation of GTKonnect PRM, helps manage your C-TPAT program efficiently and seamlessly. GTK C-TPAT provides users the ability to electronically interact and gather information from various supply chain partners regarding their C-TPAT status. Use this information to create a risk assessment profile for the supply chain partner

Some salient features of GTKonnect C-TPAT are:

1. Manage all parties in supply chain

- o Whether a vendor, manufacturer, forwarder, consolidator, carrier, trucker or any other party in supply chain, GTKonnect C-TPAT facilitates the certification process

2. User defined questionnaires

- o Ability for the users to design questionnaires to meet each unique requirement
- o Flexible and configurable questionnaire flow
- o Weights and scores based on each question and response

3. Risk Assessment

- o Assess supply chain risk based on responses received from the supplier chain partner

4. Reporting

- o Complete reporting and C-TPAT history tracking
