

EXPORTS

Our Solutions...Your Success

GTK Exports Product Features

GTKonnect Exports automatically prepares, manages, and retains all standard and U.S. Customs required export documentation, including: SLI, commercial invoice, packing list, Canadian Customs Invoice, NAFTA declarations, SED, etc. Additional features provide automated designation of required forms for destinations or specific customers.

Salient Features of GTKonnect Exports are:

- o Automatically generates just the right documents for each and every customer or consignee.
- o Print on demand, or automated document delivery settings to provide email, autofax, or hardcopy documents.
- o ABI connectivity to validate key data and to generate and transmit SED details.
- o Easily manage business concerns such as splits and consolidations with simple one step applications.
