

## Document Imaging System (DIS)

**Being** able to send docs for review to US customs is not only a time-saving process but also reduces paper and saves a tree

**Customs** sends a doc request by email, phone or direct transmission to the entry.

**The user** can send docs directly from the import image repository or uses our standalone module to add docs and transmit.

**Once docs** are sent; Customs sends an acknowledgment message. Messages are loaded to the DIS transaction and the import entry.

**Simple** and easy to use! Save a tree and use DIS to manage all your customs document requests.
