

Free Trade Agreement

Solicitation

Once the base data is in place now you can start your validation process. GTK FTA drives the solicitation, review, and approval for certification with a comprehensive workflow

Accept/Reject

Accept, reject or ask for additional information. Built-in workflow helps to ensure the process is completed (signed supplier certificates) and efficiently managed.

Analysis

Analyze complex BoMs for global preferential trade program qualification

What If?

Want to know if changes in your supply chain will provide benefit - use GTK's FTA "What if analysis?" to add different scenarios and review results.

Certificates

Generate certificates to your end clients for finished products - whether conforming or not
