

## Global Supply Chain Security

### **Data Maintenance & Upload**

Standard formats for uploading master data, vendors, partners, questionnaires and other solicitations via Excel, CSV or flat file.

### **Efficiency and Automation**

Setup and questionnaires quickly for managing various security programs. Automate solicitation and follow up, review, action plan creation, and closure to ensure protocols are adhered to.

### **Graphical Risk Assessment Creation**

Once the solicitation process is complete, you can graphically display risk areas across your supply chain or within an operational flow.

### **Manage all Parties in your Supply Chain**

Using GTKonnect GSCS helps manage the certification process for any other party within your supply chain both internally and externally.

### **Build Your Own**

GTK's GSCS module is flexible for any program AEO, PIP, C-TPAT, quarterly security self-audits or even anti-bribery assurance.

### **Workflow**

You build the questionnaire or validation, build the workflow, score and add action items. This builds a sustainable process for managing security and compliance.

### **Dashboards**

Manage solicitation, review and action plan progress through active dashboards.
