

ISF 10+2

Master Data

Master Data contains all the attributes and parties to help minimize reentry of data.

Parties

Manufacturers, Selling party, Consolidator, Stuffing location can all be created from the same screen through a single data entry

Hts And Co Data

HTS and Country of Origin data are stored for reference and validation.

Parts Database

Parts database provides the ability to maintain the company's products with their specific attributes.

Processing

We know change is a challenge. So if Process ISF's from any country at any time, in your lowest cost environment. Visibility and control still remain with US operations where the POA resides.

Templates/Copy

Use predefined templates or copy previous transactions to increase efficiencies.

Get Fancy

If you really want to get fancy look at integration opportunities with your ERP or with our Pre-entry module and validation/audit tools.

Proof Is In The Pudding

8 of the 10 data required elements can be completed with just three mouse clicks.

Dashboards - Manage And Control

Manage the process through interactive dashboards tuned to your business rules.

Customer Service

Need help or have an issue - support is only a click away. We have resources at your call 24 hrs a day.
